

Shippers, 3PLs, NVOCCs, consolidators and carriers use DISPATCHcaptain™ for strategic truck and road-rail transportation management.

**EFFICIENT** ▶ DISPATCHcaptain™ is a strategic transportation and road-rail system that assigns intermodal moves to third-party truck and rail carriers. The core functions include auto and manual truck dispatch, rail dispatch, mass updates and reporting.

**latest TECHNOLOGIES** ▶ DISPATCHcaptain™ is a web-based application that will interface with your system to automatically download bookings with intermodal legs. Full integration with other applications is also designed, such as routing data, costing data and tracking information.

**SIMPLICITY** ▶ DISPATCHcaptain™ reduces training times significantly, is simple to use and is a proven tool that reduces errors within the dispatching process.
