

Sit back and let the RAILcaptain™ manage your interfaces with the railroads. Full , paperless, fax free automation with the railroads.

BUSINESS PROBLEM SOLVED

➤ To manage the intermodal rail-billing effectively, carriers must provide specific information to the railroads in order to move freight. If a carrier lacks a tool to file information systematically, they must complete this on paper and communicate via fax. **RAILcaptain™** automates this process.

AUTOMATE

➤ **RAILcaptain™** automatically sends EDI messages to and from the railroads, determines rail routes and determines if a rate is assigned, without any business user data entry.

REDUCE COST

➤ **RAILcaptain™** manages your railroad business with greater data accuracy, tracking and control over rail-billing, integrated rate management and hazardous controls, all designed to remove time and cost from your company.

Technical Specifications

- Internet Access, IE 5.0 or higher
